

**Belt Cutter** is both a cutter and squaring arm. However, the square should not be used if the belt edge is uneven. A double edged blade cuts in the push and pull mode as the blade penetrates deeper through the belt.

NUMBER	PRICE
C-12	\$ 310.32
C-24	360.46
C-36	413.06
C-48	469.26
C-60	529.76
C-72	639.82

EXTRA BLADES \$17.54 EACH.

**Belt Clamps** are made of high strength aluminum alloys. They are rugged while light in weight and easy to handle. The unique design provides constant pressure applied to the belt while the belt clamps are under tension. The more tension applied, the greater pressure transferred to the belt. The aluminum power clamps are attached to alloy steel chains which are designed to be used with ratchet pullers. Priced as a side, but used in pairs (2 sides).

NUMBER	PRICE
BC-18	\$ 411.72
BC-24	440.52
BC-30	486.58
BC-36	532.64
