

STAPLEGRIP

For use with modern lightweight, high strength belting. Designed to operate smoothly over slider bed or troughing conveyor applications.

Staplegrip is a very strong belt fastener; hinged plates are held in compression with high tensile stainless steel staples.

A unique feature of this style of product compared to conventional lightweight belt fasteners is that the staples are clinched 90 degrees to the direction of the pull of the belt. Therefore, it is virtually impossible for the staple to open under load. The staples are also unique. While other brands may be rectangular, with their narrow dimension in line with the pull of the belt, Staplegrip staples are oval shaped with smooth rounded edges. This design feature reduces the possibility of the staple damaging belting fabric.
