

Clamps

Dixon Smooth I.D. Clamps

As industrial hose made of stiffer, thinner thermoplastics replaces soft, spongy thick-walled rubber, a new generation of hose clamps has been developed to prevent leak problems. The smooth I.D. clamp is manufactured in a wide variety of widths, sizes and materials that provide a uniform, gap-free inside diameter, and strong holding power. For use with roll over type clamp tools and most common band clamp air tools such as the 51960 and 51970 band tools on page 289.

- Unique dimple design offers excellent sealing strength while maintaining radial compression
- Ideal for thin wall hose
- Low profile clamp
- Heavy buckle provides optimal holding power
- Clamp can be applied with the F100 hand tool located on page 288.

Clamps sold in box quantities only
