

Clamps

Service ratings are based on hydrostatic tests using standard-molded Buna-N material gaskets (page 329), with proper installation of ferrules, assembly of joints and absence of shock pressure. Contact Dixon for service of other type and material gaskets, and for ratings at higher temperatures. All ratings shown are dependent upon related components within the systems and proper installation. **For temperatures above 250°F, we recommend using only #13MHP clamps.** This information is only valid if Bradford™ clamps, ferrules and gaskets are used.

Single Pin Squeeze Clamps - 13MHHM-Q
