Hydrasearch, established in 1962, is a division of Dixon and a large multi-divisional manufacturer and global distributor of diverse commercial hose, technical products and fittings. In 1995 Hydrasearch purchased the Technical Products Company, allowing us to introduce a line of high pressure O-Ring face seal valves and pipe and tube fittings.

Today, Hydrasearch products can be found on submarines, surface ships, helicopters, fixed-wing aircraft, tanks, and ground equipment throughout the world. With our experienced staff, expanding product line, and growing global distribution, Hydrasearch continues to improve and expand to meet your needs today and into the future.
