

## Pipe Fittings

Your applications demand quality and reliability of your pipe fittings, along with expeditious delivery. Now businesses servicing food, dairy, beverage, and meat processing can trust Bradford™ sanitary schedule 5 and 10 pipe fittings.

Dixon Sanitary offers a wide variety of schedule 5 and 10 fittings in 304 and 316 stainless steel that are available from our thirteen distribution centers - so we can ship the parts you need within twenty-four hours.

### Bradford™ quality: maintaining the **A<sub>3</sub>** standard

The Sanitary Standards were originally created by the dairy industry as a voluntary benchmark for sanitary safety. The standards are still developed collaboratively by a group of processors, suppliers, and sanitation specialists.

Dixon Sanitary has earned the 3A symbol through the Third Party Verification (TPV) program, which requires a professional assessment rather than voluntary compliance to make certain each product conforms in all respects to the published standard. The standards are accepted by the USDA and USFDA.

Bradford™ Sanitary Fittings meet 3A Sanitary Standards for Sanitary Fittings for Milk and Milk Products, Number 63-03 (Authorization number 621). See the Dixon Sanitary website, [www.dixon-sanitary.com](#), to download a PDF of the certificate or call Dixon Sanitary.

Dixon Sanitary is proud to be a participant in the 3A TPV program.
