

## Tube Hangers

Unlike some competitors' hangers, Dixon Sanitary quality tube hangers are highly polished, with all sharp edges removed. In addition to quality, the Bradford™ name stands for hanger selection for tubing from ½" - 8". Whatever the application, we have a style to fit the need at a price that doesn't leave you hanging out to dry.

The Dixon Sanitary line includes the following hanger styles:

- Hex tube hangers for added flexibility in temperature variations
- Round tube hangers to resist movement and vibration
- Block tube style for added flexibility and FDA application

This tube hanger selection is available from our thirteen distribution centers - so we can ship the parts you need within twenty-four hours.

## Support Recommendations

- Lines are not to be rigidly anchored to equipment. Lines must be allowed to float. Temperatures cause expansion and contraction and if mounted incorrectly will cause distortion and possibly leakage.
- Proper Installation:
  - Straight sections need support every 10 feet
  - Each side of every valve (as close as possible to the connection) needs support
  - Support at each change of direction
