

## Valve Automation

Bradford™ stainless steel pneumatic vertical canister actuators are designed for use on butterfly valve sizes up to 4". They are available with the Bradford™ control top, in addition to other accessories.

Bradford™ stainless steel pneumatic horizontal actuators are designed for use on ball and butterfly valves. A special double acting design is for use on the B5102 series butterfly valve. Rack and pinion actuators can be used on either ball or butterfly valves.

Bradford™ aluminum pneumatic rack and pinion horizontal actuators are designed for use on all ball and butterfly valves.

Bradford™ electric actuators are designed for use on all ball and butterfly valves.

Accessories for valve automation are not limited. Dixon Sanitary can offer almost everything necessary to automate any Bradford™ valve, or any other manufacturers valve.

Dixon Sanitary products are rugged and dependable. Most actuated products can ship within 24 hours of the order being placed.
