

Benefits

Wide range of natural and synthetic rubbers

- Incompressible—can be deformed, depending on durometer and cross section, but can never be reduced in volume
- Extensible—can be assembled over a projection or shoulder and snap tightly within a groove
- Highly impermeable—can serve as a tight barrier against the passage of gases or liquids
- Elastic—little flange pressure required to effect intimate contact with gasket, allowing it to move with the flange surfaces, always maintaining a seal
- Complies with RMA (Rubber Manufacturing Association)
