

Rubber coated belts

Round belts

Polyurethane round belts (TPU)

Habasit (Polycord® and Habicord) round belts can be used as conveying elements or for driving applications. They are particularly suitable for angular gears. Habasit offers a comprehensive range of round belts made of high quality polyurethane in diameters between 2 and 15 mm. The round belts can be made endless on the machine by welding the ends which allows easy installation and maintenance with minimum downtimes.

	Features	Benefits
 	<ul style="list-style-type: none"> • Multifunctional • Multidirectional 	<ul style="list-style-type: none"> → Simple and cost-effective machine design → Angular gear suitable
	<ul style="list-style-type: none"> • Elastic material (Polyurethane) 	<ul style="list-style-type: none"> → Forgiving/reducing shocks and able to cope with intermittent overloads → No tensioning device needed → No re-tensioning required → Simple and cost-effective machine design
	<ul style="list-style-type: none"> • Simple and quick joining (Quickmelt - butt joint) 	<ul style="list-style-type: none"> → Easy to handle welding method → High strength over joining area → Fast belt exchange possible → Maintenance-friendly product → Long belt life
