

# INERTEX UHF GASKET TAPE

**INERTEX UHF Gasket Tape** looks and feels different from other gasket products. It is soft and flexible with an exceptionally uniform density. Under the surface is a microscopic structure that makes this remarkable material **one of the strongest, most versatile gasket materials available today!**

Manufactured in our **ISO 9002** facility, **INERTEX UHF Gasket Tape** is made of 100% expanded virgin PTFE. **INERTEX** alone uses a patented process that produces a **Uniform and Highly Fibrillated** microstructure with thousands of small fibers running in many directions. These create a soft and pliable, yet, very tough gasket material that can seal surface irregularities up to .007" in depth with a relatively low clamping force. **INERTEX UHF Gasket Tape** is FDA suitable and comes with a **full paper covered self-adhesive** backing that makes installation simple.
