

Snap-tite NGV1 Fueling Receptacle

Snap-tite's receptacle is designed for permanent mounting to a natural gas vehicle (CNG).

Snap-tite's receptacle utilizes the NGV1 Profile which allows complete interchangeability to any nozzle conforming to the NGV1 standard.

Features

- ▶ Superior poppet check valve design:
 - a) Polyurethane crimped seal to eliminate erosion and washout
 - b) Non-barrel type poppet to reduce sticking due to contamination and icing between the outside diameter of the valve and the inside diameter of the body bore
 - c) Self-centering capability of the poppet
- ▶ One-piece receptacle design
- ▶ High strength 316 Stainless Steel valve stop to provide a positive stop for the valve
- ▶ Superior flow characteristics
- ▶ Available in either 316 Stainless Steel or Brass construction
