

THE BEST GLOVE FOR ANY APPLICATION

Best[®]
Protection At Its Best

BESTGLOVE.COM

CATALOG

Preserving and protecting the “human touch” is at the heart of what we do. Because we know so much of a company’s success is invested in its customer touches. At every touchpoint, there’s contact and opportunity. Whether it’s protecting your workers from an array of hazards, or protecting your product, Best Manufacturing makes the gloves that keep you in touch with your success.

CUT RESISTANT GLOVES

26

More than 80-percent of all hand and arm injuries are due to cuts and lacerations. Most of which can be traced to an absence of gloves. That's why we make gloves and protective sleeves that not only resist cuts, but are also comfortable to wear, ensuring compliancy as well as safety.

BEST IS...

Quite simply, Best Manufacturing is the world's most innovative and leading designer, developer and marketer of hand protection. With a history of firsts stretching back to the 1950s and its first patented crinkle-finished rubber coated work glove the Nitty Gritty®, Best has continually searched to provide hand solutions to the men and women on the front lines of industry, medicine and homeland security.

• INNOVATION

By percentage, no other glove manufacturer spends more on research and development and overall technical services than does Best Manufacturing. With our gleaming new, eight thousand square-foot Tillotson-Looper Technical Center, Best not only develops new hand protection but also conducts the most comprehensive chemical analysis and testing within the personal protective equipment industry. It's that commitment that delivers revolutionary

breakthroughs like N-DEX® and N-DEX® Free, the world's first disposable nitrile and accelerator-free nitrile gloves.

• SUPPORT

Best's dedicated roster of worldwide sales representatives means that no matter where you and your job are, access to a knowledgeable hand protection expert is always nearby. Best hand protection specialists can help you identify your hazardous challenges in the workplace and the hand protection solutions to meet them. And with our new website simply click onto "Contact Us" and find your salesperson by zip code. And don't forget to ask for a comprehensive Best Hand & Arm Hazard Assessment™.

• SERVICE

Extending the absolute Best in customer service is more than simply lip service at Best. For the third consecutive year, we've achieved a 97.9 percent customer satisfaction and on-time delivery performance score. Our Customer Service department consistently ranks among the top among safety manufacturers of any size. That satisfaction rating also owes to our continuous development of new and more customer-friendly terms for doing business. Programs like our Best Bet™ program that allows customers to try before they buy. Simply purchase a case quantity of a glove through your authorized Best distributor and if you're not satisfied, return the gloves and pay nothing.

OUR QUALITY

At Best, we are dedicated to supplying you with the highest quality hand protection available in the world today. We have dedicated professionals at each of our manufacturing facilities to ensure that every glove meets our tight specifications for quality. Many of our manufacturing facilities are also ISO 9000 registered. The goal of our total quality management program is to provide you, our customer, with total satisfaction.

OUR TECHNICAL HOTLINE

To help you determine which Best® general-purpose or chemical resistant glove to use in a specific application, contact Best Technical Services at 800-241-0323. One of our trained technical service personnel will be happy to assist you.

GLOVE LAUNDERING

Many of our gloves can be laundered, which means they can be washed or dry cleaned and then re-used for added value. We include specific laundering instructions with these appropriate Best styles.

SANITIZED®

Best supported and cut-and-sewn gloves are Sanitized®, a value-added process in which we chemically treat the fabrics we make for our gloves with an anti-microbial bacteriostat, which retards the growth of mold, mildew, and other normal skin microbes and helps negate the effects of perspiration. This means Best Sanitized® gloves stay fresher and serviceable longer, giving you greater value.

FREE HAND & ARM HAZARD ASSESSMENTS

For a comprehensive, no-obligation analysis of all your glove needs, including chemical-resistant gloves, please contact Best Customer Service at 800-241-0323. A Best sales representative will then contact you or the appropriate individuals within your organization to discuss and arrange details of the assessment. After the assessment, you will receive a detailed, written report with our recommendations for a hand-and-product-protection program designed to give you the most cost-effective combination of safety and productivity.

BEST BET TRIAL ORDER PROGRAM

Our Best Bet trial order program lets you evaluate our gloves in actual applications and conditions on a no-risk, satisfaction-or-no-pay basis. Trial order either a case, a dozen or a dispenser of the style most suited to your needs. We'll pay the freight. You'll have thirty days from distributor invoice date to test the gloves to determine if they're the solution to your particular hand or product protection problem. We bet they will be, but if you're not completely satisfied, you don't pay for the gloves. It's that simple. Ask your authorized, local Best distributor, your Best sales representative or call our Customer Service Department in Menlo, GA (800-241-0323) for details on how to place a Best Bet.

FREE GLOVE SAMPLES

Upon written request, Best will provide you with actual glove samples to assist you in determining which Best glove to use in a particular application. You may either e-mail us your request online through the Medical and Industrial Products pages or send your written request to:

ASSOCIATIONS

Best Gloves is a member of the following industry associations:

- American Chemical Society/ACS
- American Industrial Hygiene Association/AIHA
- American Institute of Chemical Engineers (AIChE)
- American Society for Quality (ASQ) (formerly American Society for Quality Control)
- ASTM International
- Institute of Environmental Sciences and Technology/IEST
- National Fire Prevention Association/NFPA
- National Hand Protection Association/NHPA
- National Industrial Glove Distributors Associations/NIGDA
- Safety Equipment Distributors Association/SEDA

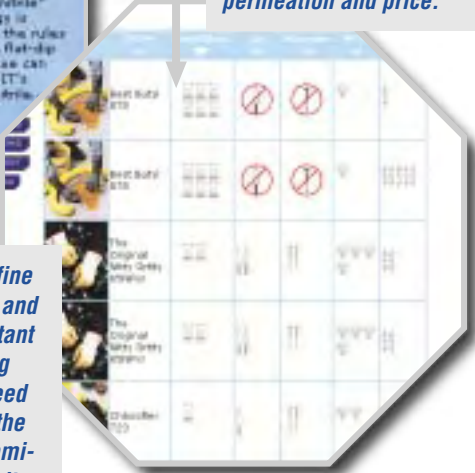

This question is at the core of all that we do here at Best. Helping you find the answer is our job. It's also the engine that drives our new home on the World Wide Web, www.bestglove.com.

On every web page, you'll find a dedicated button enabling you to search for the best glove for you by the criteria important to you.

You can initiate a Search based on specific applications, hazards or chemicals. Your results will appear based on your criteria.

In addition, each glove is further categorized by performance in cut, puncture, wear, chemical permeation and price.

Use these criteria to further refine your search by simply clicking and re-ordering what's most important to you and your needs. Working with a specific chemical but need a puncture-resistant glove for the job? Simply search by that chemical and then re-order your results by gloves that perform the best in puncture-resistance. Need greater information and deeper testing results for chemical applications?

Simply click onto our Chemrest button and access the world's most comprehensive chemical reference database designed for hand protection. With more than 600 individual chemicals, over 100 chemical classes, and all organized by CAS#, Chemrest is the most thorough chemical permeation and testing glove reference database available.

Bestglove.com also gives you access to the latest information on our award-winning hand protection, direct links to our list of authorized distributors, search by zip code for your local Best sales representative and so much more. You can even download .PDFs of our sell sheets and flyers, technical data sheets as well as this catalog. We hope you find our new home your new home for identifying, evaluating and selecting the best glove for you and your job.

POLYMERS

Naturally occurring and man-made polymers are essential building blocks of hand protection. Specific polymers protect workers from specific hazards. There is no ideal glove that works in every situation. Best utilizes a variety of polymer coatings and fabrics, designed for a variety of tasks.

Natural Rubber

Natural Rubber, the most elastic substance known is found in over two hundred plants including the rubber tree (Hevea Brasiliensis), the source of natural rubber latex used to manufacture some Best gloves.

Natural rubber is a flexible and soft, yet tough and durable coating that provides excellent protection from physical hazards and provides an outstanding grip. Natural rubber provides excellent protection from exposure to aqueous chemicals such as acids and caustics, and limited protection from alcohols and ketones. Natural rubber gloves do not hold up well in organic solvents, oils, greases or fuels such as kerosene or gasoline.

CAUTION: Natural rubber latex has been shown to cause allergic reactions in sensitized individuals.

Neoprene® (Polychloroprene, CR)

Strong, durable Neoprene gloves provide excellent protection from physical hazards such as cuts and abrasions and also provide excellent chemical resistance for protection from exposure to organic and inorganic acids. Neoprene gloves also provide excellent protection from many organic solvents, oils, greases and petrochemicals and resist degradation from ozone, sunlight and oxidation. In addition, Neoprene remains functional and flexible at temperatures ranging from -10° to 300° F (-23° to 150° C).

Neoprene® is a registered trademark of Dupont

Nitrile (Acrylonitrile-Butadiene rubber)

Nitrile, a versatile synthetic copolymer, is used to make a variety of gloves ranging from heavy duty work gloves to ultra-thin medical and clean room gloves. Nitrile coating provides tough protection from physical hazards such as cut, puncture or abrasion. Nitrile dipped gloves also provide chemical resistance to petrochemicals (especially fuels), oils, greases, pesticides and other agricultural chemicals while providing excellent dexterity.

PVC (Polyvinyl Chloride)

PVC is an economical synthetic thermoplastic polymer that is exceptionally durable. PVC gloves provide excellent protection from limited chemical exposure and physical hazard protection. They are noted for being durable and function well in temperatures ranging from -30° up to 212°F (-34° up to 100° C).

Butyl (Butyl Rubber)

Butyl Rubber's tight molecular structure provides excellent chemical resistance to gases and ketones. Butyl gloves are manufactured in unsupported version only and are used by the military for protection from chemical warfare agents. Butyl rubber is severely affected by exposure to fuels and aliphatic and aromatic hydrocarbon solvents.

Viton® (Fluoroelastomer)

Viton provides excellent chemical resistance to fuels used in the aerospace industry. It provides excellent protection from exposure to aromatic hydrocarbons such as benzene, toluene or xylene. Viton gloves are available in unsupported version only. For working with extremely hazardous chemicals such as carcinogenic or highly toxic chemicals, Viton works where no other glove works.

Viton® is a registered trademark of Dupont.

Polymer Combinations for the Best® of Both Worlds

Certain combinations of polymers are used to make hybrid gloves that feature Neoprene over natural rubber latex gloves that are used in Best Chem Master™ gloves. Viton® over Butyl is used to make the highly chemical resistant Best Viton® II glove. Nitrile is used as an overdip in several Best natural rubber gloves to provide added resistance to aging, ozone and chemicals.

CUFF DESIGNS

Knitwrist: designed to keep glove firmly in place, prevents debris from entering glove, enhances warmth, should not be used where quick glove removal is needed.

Safety Cuff: allows glove to slide on and off easily, helps protect wrist, releases quickly from hand, won't soften when exposed to perspiration or washing.

—10"
—12"
—14"
—16"
—18"

Gauntlet: provides additional protection for lower forearm, allows maximum forearm dexterity, lets glove slide on and off easily, protects wrist, releases quickly from hand.

Note: Unsupported gloves may have a rolled cuff, a serrated cuff or a straight cuff.

Color Coded Cuffs: Many of our styles have color-coded cuffs for easy size identification and pairing after laundering.

GRIP DESIGNS

Supported gloves

textured grip

wrinkle finish

breathable vinyl

rough nitrile

Unsupported gloves

bisque finish

smooth finish

tractor tread

Note: Some Best gloves have no special grip design, yet still provide good gripping power due to the intrinsic properties of the particular glove polymer.

Disposable Gloves: This category of unsupported gloves is generally characterized as a thin-gauge glove that is not intended for repeated use. They may have a donning agent such as powder or may be powder-free.

Laminated Gloves: This special nitrile-coated fabric is made by transfer-coating the nitrile polymer onto a textured surface and then laminating the nitrile film onto Sanitized® poly-cotton fabric for superior comfort and flexibility.

Impregnated Gloves: This special nitrile or PVC-coated fabric is made by knife-coating nitrile or PVC directly onto Sanitized® cotton fabric.

Supported Gloves: These gloves offer a polymer coating over a cotton, nylon or aramid liner. The textile substrate imparts added strength and resistance to abrasion, cuts and punctures.

Unsupported Gloves: These are polymer gloves with no textile lining. These gloves include heavyweight, medium weight or disposable gloves. They may be chlorinated or have a cotton flock lining for easier donning.

Cut Resistant Gloves: This special category is characterized by the utility of the gloves and includes either polymer coated gloves or special high performance yarns that are designed to impart cut-resistance or combinations of these.

GLOVE SIZE CHART

Glove Size	XS	S	M	L	XL
Hand Size	6-7	7-8	8-9	9-10	10-11

Sizing: Use a tape measure to find the circumference of your hand around the palm area. This is close to your actual glove size. For example, 7" is equal to a size 7 glove. Sizes can vary among different manufacturers and styles. For easy size comparison, refer to the above chart and note color coding.

MIL THICKNESS

1 mil = 1/1000 of an inch

CHEMREST.COM

Best® CHEMREST.com is the website dedicated strictly to selecting gloves for chemical resistance. This user-friendly website contains ASTM and CE compliant chemical resistance data for over 9000 chemical tests and includes the following features.

- Over 300 pure chemicals or chemical mixtures tested
- 16 different Best gloves tested including new styles
- ASTM test methods for two levels of exposure, heavy and intermittent
- ASTM F739-96 Standard Test Method for Permeation by Liquids or Gases Under Conditions of Heavy Continuous Exposure where glove materials are totally immersed in the test chemicals for eight hours
- ASTM F1383-96 Standard Test Method for Permeation by Liquids or Gases Under Conditions of Intermittent Contact where glove material is exposed to the test chemical intermittently
- Degradation testing at four time intervals
- EN 374 ratings for permeation breakthrough time
- Toxicity and risk information for over 300 chemicals
- NFPA health, flammability and reactivity for over 300 chemicals
- International Agency for Research on Cancer status for each chemical
- American Conference of Governmental Industrial Hygienists "Skin-Notation" chemicals are noted
- Environmental Protection Agency's "Extremely Hazardous Chemicals" are noted
- Pictures of each glove with complete information on ordering and uses
- Search the Website by chemical name or CAS number
- E-mail technical questions to Best Technical Services or contact your Best representative in your national or international area
- Print out chemical resistant table to your printer for each chemical
- Linked to Bestglove.com

CUSTOMIZED CHEMREST™ TESTING

Under certain conditions, we can use our state-of-the-industry permeation testing equipment to analyze the particular chemical or chemical mixture from which you're seeking protection to help you determine which Best chemical-resistant glove you should use. Call 800-241-0323, for more information.

Some testing procedures are subject to a modest service fee. Quotations offered upon request.

LIMITED WARRANTY AND DISCLAIMERS

Best warrants only that gloves manufactured by Best will be free from defects in materials and workmanship at the time of manufacture. This limited warranty expires one (1) year after shipment. This limited warranty is exclusive and in lieu of all other warranties, express, implied, or statutory. Best's entire obligation and the exclusive remedy to any party for breach of this limited warranty shall be limited to replacement or refund of the original purchase price of the product, at Best's option, and subject to customer's compliance with Best's Returns policy. Best's limited warranty shall not apply, however, to Best-made gloves that have been subject to misuse, accident, or negligence during service, handling, or storage.

DISCLAIMER OF IMPLIED WARRANTIES

All implied warranties which may arise by implication of law or application of course of dealing or usage of trade, including, but not limited to, implied warranties of merchantability or fitness for a particular purpose, are expressly excluded. There are no warranties which extend beyond the description on the face hereof. The end user is solely responsible for the suitability of the glove selection for a particular application.

FORCE MAJEURE

Best shall not be liable for delay in or failure to perform any of its obligations if the delay or failure results directly or indirectly by Force Majeure. "Force Majeure," as used herein means any law, order, regulations, or government action; failure or delay of transportation; suspension or cancellation of any required license(s); insurrection, riots, national emergencies, war, acts of public enemies, strikes or other labor difficulties; inability to obtain necessary labor, manufacturing facilities, materials or components from Best's usual sources; fires, floods or other catastrophes; acts of God or any cause of like or kind beyond our control.
