

Alligator® Rivet Fastening System

AR200A

Alligator® Rivet is a strong, easy-to-install splice for round hay baler applications.

Easy, On-Site Installation at a Lower Cost

The Alligator Rivet splice is easier to install – and less costly – than other competitive brands. And, without ever removing the belts from the baler, field installation is quick and easy with only the portable application tool and a 1 lb. hammer.

High Strength and Longer Life

Rugged, stainless steel design is abrasion- and corrosion-resistant and has a long life for severe, heavy-duty applications.

Fasteners are available in 4", 6", 7", 10" and 14" (100 mm, 150 mm, 175 mm, 250 mm and 350 mm) pre-cut lengths, and can be cut to shorter lengths.

Self-setting rivets accommodate belts 1/8" to 7/32" (3.2 mm to 5.6 mm) thick and 3-1/2" (88 mm) minimum pulley diameters. They can be applied to all types of baler belting, including used belts.

The connecting pin is designed for long life. It is a large diameter (.140" or 3.6 mm) hardened spring, stainless steel material.
