

1-Ear Clamp with Mechanical Interlock

OETIKER

Product Group 105 & 155

Features

- Narrow band – 7mm
- Lightweight
- Specially formed strip edges reduce the risk of damage to the part being clamped
- Mechanical interlock allows use of pre-coated materials
- Tampering is visible
- Fast and simple to install

Economical quality clamp for low-pressure applications. Developed for a variety of applications in the automotive industry, general industry and for applications involving synthetic tubing.

The mechanical interlock also eliminates the need for spot welding at the joint, which would then make it vulnerable to corrosion.

Material

- 105 Galvanized or zinc-plated steelband
- 155 Stainless Steel, Material no. 1.4301 / UNS S30400

<i>Size range</i>	<i>Width x Thickness</i>
10.5 - 116 mm	7.0 x 0.6 / 0.75 mm

Customer-specific sizes available on request.

Installation

See page 27 and Technical Data Sheet.

Application Example
Dispensing Equipment

Application Example
Irrigation systems

For detailed information, please request the Technical Data Sheet for this OETIKER product group. Send your sample parts and all relevant information for your specific application to OETIKER, and you will receive our recommendation for product type, diameter, and method of installation.
