

# SmartClamp™

As part of the FlexcoSafe™ belt conveyor maintenance solutions, the SmartClamp™ system provides both safety and efficiency when clamping belts for the installation of Clipper® and Alligator® mechanical belt fasteners.

A complete system to  
**Work Safer.**  
 Work Smarter.

## **Faster. Easier.**

Unlike other clamp systems which require time consuming adjustments, the SmartClamp™ only needs a quick tap of a hammer to prelock the wedges. Attach and tighten come-alongs and the final lock is engaged. This fast set up saves precious and costly time during a breakdown situation.

The belt clamps can also be conveniently used to 'string' new belts onto the conveyor structure. The belt is clamped in same manner and the pull loop doubles as a handle to quickly and easily string the belt.

## **Safer. Stronger.**

The SmartClamp was thoughtfully engineered to maximize strength and performance. The wedge grip design places an evenly distributed pressure load over the entire clamp interface. The set of four clamps permits for safe pulling of belts with up to 2,000 pound of load.

## **Smarter.**

With SmartClamps you do not need to sacrifice efficiencies for safety. These easy-to-install belt clamps make the choice obvious for maximum belt conveyor uptime.
