WARRANTY: All NOTRAX® & AKRO® floor matting is manufactured of the highest quality material and workmanship. Dependability and service of our products are guaranteed under normal conditions of use, or a full refund or replacement (based on the manufacturer's discretion) will be made. Buyer has the responsibility to determine the suitability of the product and assumes any liability in connection with such use. Seller shall not be liable for damages in excess of purchase price of product. Warranty does not apply to splicing or seaming of mats. Laminate - top products (including UniFusion™ products) with foam backing are not guaranteed against spike heels or stool legs.

Superior Manufacturing Group guarantees the bond on all NoTrax® laminated mats that incorporate the UniFusion™ process for the lifetime of the mat. The bond is guaranteed under normal conditions of use in reasonable dry application environments, or a full refund or replacement mat (based on the manufacturer's discretion) will be issued. Proof of purchase is required for all refunds or replacements. This lifetime warranty protects against de-lamination or bond failure, and does not cover issues unrelated to the bond such as wear or foam tears.

PRODUCT SPECIFICATIONS: All products are manufactured to meet or exceed normal industry standards. Reasonable variations in size and/or color may occur. Tolerances will vary by manufacturing process. For specific information on any given product, contact our customer service department.

Full Rolls on carpet mats only have vinyl borders on the sides, ends are not provided with any nosing. If finished, nosed ends are required, the roll is priced at the "Cut Lengths" level which is a 15% up-charge.

All Entrance matting passes the Flammability Test DOC-FF-1-70. The only carpeted entrance mats that should be considered for splicing are the #130 Sabre/Polyplush™ and the #131 Dante™. Matting should never be stored on-end. For proper storage, roll mat with top surface to the outside and lay flat in a protected area. Do not stack any materials or other matting on top of a stored mat. When placing a mat into service, be certain that the floor to be covered and the back of the mat are completely free of dirt and debris. Foreign material on the floor or the mat will cause slippage and possible injury. Manufacturer will not be liable for any injuries resulting from failure to follow recommended housekeeping procedures. Frequent cleaning under mats is also required to maintain warranty.

TERMS: 1% 10 Days, Net 30 Days. Discount applies ONLY to invoices paid within 10 days of invoice date. (Shipping charges, handling charges and taxes are excluded.)

PAYMENT: Superior Manufacturing Group accepts payments via VISA® and MASTERCARD®. C.O.D. payments no longer accepted.

PRICING: All prices are manufacturer's suggested list. Pricing quoted only to existing NOTRAX® & AKRO® Distributors. Prices are subject to change without notice.

ORDERING: When ordering, specify product number, size, color, quantity and any special instructions required.

MINIMUM ORDER CHARGE: No minimum order required. However, a \$5.00 small-order handling charge will be added to all orders having a net value of \$25.00 or less.

FREIGHT TERMS: F.O.B. Factory, -IL, GA or MS (see "Location" shown for each item) - No Freight Allowed. A handling charge will be imposed on all U.P.S.™; FedEx™ Ground & FedEx™ Shipments.

DAMAGED GOODS AND SHORTAGES: All delivered material should be inspected and counted BEFORE accepting shipment. Any damages or shortages should be documented on freight bill. If any discrepancies occur, please contact our customer service department for assistance in filing a claim.

RETURN GOODS AUTHORIZATION: Factory approval is required prior to product returns. Standard stock items in new saleable condition will be accepted for return, freight prepaid subject to a 15% or 20% (depending on product) restocking charge. Custom sizes, cut lengths or special ordered products are non-refundable and non-returnable. Return shipments must be made to the correct plant as noted on the return goods authorization. Failure to do so will incur a transportation fee deducted from the credit.

RESTOCKING CHARGES:

SUPERIOR MANUFACTURING GROUP, INC.

Superior Manufacturing Group, Inc.,
is a proud member of the
U.S. Green Building Council.

- **Sales Tip:** Use in toughest industrial environments where worker fatigue prevention is most critical. Ideal for multi-shift environments.
- **Where to Specify:** Any work cell where worker is at the station for prolonged periods of time.

- One of the 4 most comfortable mats available for dry area applications.
- Durable vinyl diamond-plate top surface is combined with dense closed cell foam base utilizing NOTRAX® exclusive UniFusion™ technology.
- UniFusion™ bond guaranteed for the life of the mat – See warranty for details
- Overall mat thickness is a full ONE-INCH.
- Sloped beveled foam on all 4 undersides affords easy access onto and off of mat.
- Manufacturer's warranty of 3 years is provided.
- Custom widths available

MARBLE SOF-TYLE™ • GRANDE™

#970

SAFETY / ANTI-FATIGUE • "DRY • SUPERIOR"

- **Sales Tip:** Easy to sweep clean or damp mop top surface. Recommend where there is attention to fatigue prevention and concern for the mat to match a décor.
- **Where to Specify:** Lab testing areas, Check-out counters, Order fulfillment lines, Pharmacies.

- One of the 4 most comfortable mats available for dry area applications.
- Smooth marble-pattern top surface of heavy-duty rubber is combined with dense closed cell foam base utilizing NOTRAX® exclusive UniFusion™ technology.
- UniFusion™ bond guaranteed for the life of the mat – See warranty for details
- Overall mat thickness is a full ONE-INCH.
- Sloped beveled foam on all 4 undersides affords easy access onto and off of mat.
- Manufacturer's warranty of 3 years is provided.
- Custom widths available

- **Sales Tip:** The only mid-priced/high performance anti-fatigue sponge mat available; durability approaching that of competitive "laminated" mats. Extends service life by 50%.
- **Where to Specify:** Four top patterns to fit the needs of work stations where longer lasting fatigue protection is required.

- Unlike urethane or acrylic top coats that are applied after the mat is produced, Dyna-Shield® is manufactured into the mat to provide a long-wearing protection to the sponge anti-fatigue mat - Outperforms competitive products in tear resistance and tensile strength.
- Four designs of Dyna-Shield® sponge mats feature a 1/2 inch thickness.
- All four sides are beveled to minimize trip hazards.

NIRU® CUSHION-EASE® GSII™ **NEW** NIRU® CUSHION-EASE® GSII™ SOLID

- **Sales Tip:** GSII™ excels in the harshest industrial environments because it resists the chemicals, oils, and greases that cause traditional rubber matting to breakdown.
- **Where to Specify:** (850) Intended for harsh wet environments where industrial chemicals, oils, and greases are commonly found. (856) should be recommended for industrial applications where exposure to chemicals, oils, and grease is light to moderate.

- GSII™ technology offers the ultimate in durability and performance in the harshest environments
- 100% Nitrile rubber compound provides the highest degree of resistance to chemicals, oils, and greases while Silicon Carbide grit surface provides long lasting traction
- Available in perforated (850), or solid top (856) versions
 - 850 has a large hole drainage system that facilitates the removal of liquid and debris from the work area
 - 856 offers solid-top construction for additional anti-fatigue relief, and is easy to clean
- Overall thickness is 3/4"
- Modular design is compatible with NoTrax® 551 M.D. Ramp System and can accommodate a variety of custom configurations (see page 22 for more information)

NEW NIRU® CUSHION-EASE®
NIRU® CUSHION-EASE® SOLID

- **Sales Tip:** The amount of slip resistance required, and exposure to chemicals, oils, and greases are the key determining factors when choosing between GSII™ or Niru® Cushion-Ease® products
- **Where to Specify:** (650) Intended for harsh wet environments where industrial chemicals, oils, greases, and animal fats are often found. (656) should be recommended for industrial applications where exposure to chemicals, oils, greases, and animal fats can create slip hazards.

- 100% Nitrile rubber compound provides the highest degree of resistance to chemicals, oils, and greases
- Available in perforated (650), or solid top (656) versions
- 650 has a large hole drainage system that facilitates the removal of liquid and debris from the work area
- 656 offers solid-top construction for additional anti-fatigue relief, and is easy to clean

- **Sales Tip:** Borders are a 100% nitrile rubber compound offering the same resistance to oils/chemicals as the mat – competitor's products use vinyl borders which can degrade.
- **Where to Specify:** All heavy Industrial environments and work cells that require worker protection from fatigue, spillage of liquids, heavy cart traffic.

- Resilient rubber compound withstands industrial cutting oils and chemicals.
- Large hole configuration facilitates drainage and resists clogging while mini-diamond studs on top surface minimize slippage.
- Colored beveled borders are permanently affixed to the mat (unlike competitors' snap-ins that come loose) and are available on 3 or 4 sides.
- Overall mat thickness is 7/8 inch.

SAFETY / ANTI-FATIGUE • "WET/DRY" • SUPERIOR™

CUSHION-LOK™ PERFORATED SERIES CUSHION-LOK™ w/ Grip-Step®

- **Sales Tip:** Factory-assembled custom configurations available - Call Customer Service for more information (800) 621-2802
- **Where to Specify:** Wet environments where drainage and slip resistance are a priority. PVC construction makes it especially resistant to chemicals found in harsh environments. Where custom configurations are a consideration.

- A tough PVC based workstation mat developed by NOTRAX® over 30 years ago to be a truly Superior mat.
- Hundreds of portholes facilitate drainage while the worker is elevated on a series of traction blades to help resist slippage and keep the worker out of the spillage.
- Six-inch wide diamond-studded beveled ramps are permanently affixed on 3 sides and perforated for drainage.
- Full 7/8 inch thickness.
- Offered in 4 versions to fit the most demanding environments:
- #520 Cushion-Lok™: All the durability as described but with a bottom surface design that affords maximum flex for worker comfort.
- #522 Cushion-Lok™ with Grip-Step®: Same as #520 but with a thick gritted layer applied to the top surface for extremely slippery environments.
- #520 HD Cushion-Lok™ Heavy-Duty: This is the workhorse! All of the above benefits but with a reinforced bottom surface design that repels crushing from extreme weights.
- #522 HD Cushion-Lok™ Heavy-Duty with Grip-Step®: Same as #520HD but with a thick gritted layer applied to the top surface for extremely slippery environments.

CUSHION-LOK™ SOLID-TOP SERIES CUSHION-LOK™ w/ Grip-Step®

- **Sales Tip:** Factory-assembled custom configurations available - Call Customer Service for more information (800) 621-2802
- **Where to Specify:** Where anti-fatigue and anti-slip is a necessity. PVC construction makes it especially resistant to chemicals found in harsh environments. Where custom configurations are a consideration.
- A sister product to the Cushion-Lok™ #520 Series. This Series features a solid top/no perforation mat that can be interlocked with the #520 Series or used as a standalone mat.
- The worker is elevated on a series of traction blades that provide sure-footing and comfort.
- Six-inch wide diamond-studded beveled ramps are permanently affixed and perforated for any incidental drainage.
- Full 7/8 inch thickness.
- Offered in 2 versions to fit the most demanding environments:
- #920 HD Cushion-Lok™ Heavy-Duty Solid: Maximum resistance to crushing featuring a reinforced bottom surface and firm support for the worker.
- #922 HD Cushion-Lok™ Heavy-Duty Solid with Grip-Step®: Same as #920HD but with a thick gritted layer applied to the top surface for extremely slippery environments.

- **Sales Tip:** Works just like a picture frame. Detailed instructions included with product. Mats can be made into any width and/or length required in 1' increments.

- For custom configuration performed on-site the patented #551 MD Ramp System™ can be purchased separately. These 100% nitrile rubber ramps fit the male/female locking system of the mat and are available as:
- 2 foot long Male Ramps
- 3 foot long Male Ramps or Female Ramps
- 5 foot long Male Ramps or Female Ramps
- All Ramps lengths are beveled and molded with mitered corners and a protruding tab. The tab locks together the two adjoining ramps for a secure, professional corner. For a square edge, simply cut-off the miter following the cut line on the bottom of the ramp.

NIRU® VERSA RUNNER® NIRU® KNOB-TOP RUNNER®

- **Sales Tip:** Ideal for long runs where low profile mats are needed for cart traffic
- **Where to Specify:** Wet or dry environments that require high traction and drainage capability.

- Both mats are made of a durable grease-proof construction featuring 100% nitrile compounding in a continuous long length.
- #755 VERSA RUNNER® is 3/8 inch thick with slotted perforations for drainage.
- Ribbed underside enhances anti-fatigue value and channels liquid away from the mat.
- #758 KNOB-TOP RUNNER® is 1/4 inch thick, has a solid top surface and allows for cart traffic to easily pass over the mat.

V-GROOVE CORRUGATED RUNNERS™

- **Sales Tip:** Recommend rubber version (#750) for applications that require a little more traction. Can be used as a liner for maintenance and tool carts.
- **Where to Specify:** Applications where safety and slip protection is needed with minimal anti-fatigue value such as aisle ways, warehouses, vending areas. Low profile matting allows for easy on/off cart traffic.

- Corrugated rib-tooth design improves traction, creates a barrier to cold flooring substrates, and creates a silencing effect over noisy tile.
- Overall thickness is 1/8 inch.
- The #730 V-Groove Corrugated utilizes a vinyl compound.
- The #750 V-Groove Corrugated utilizes a rubber compound.

- **Sales Tip:** If an entrance is not large enough to accommodate OPERA™, recommend one or more sections as individual mats. (See pages 31, 32 & 33).
- **Where to Specify:** All large, upscale entrances: offices, hotels, professional buildings.

- A NOTRAX® exclusive: the first of its kind 3 mat system in one beautiful mat design.
- The first 3 to 4 feet of the mat (depending on length of mat) features a looped non-absorbent yarn to scrape debris and moisture from foot traffic.
- The second 3 to 4 feet of the mat combines the looped scraper yarns with absorbent Decalon® looped pile to begin the drying function.
- The final 3 to 4 feet of the mat is pure Decalon® looped pile to complete the drying function.
- All yarns are color-coordinated to combine beauty with functionality.
- A dense combination of yarns ensure maximum performance.
- Overall thickness is 3/8 inch.
- A heavyweight vinyl non-slip backing ensures minimum movement.
- Recommended and approved product as a part of the GreenTRAX™ program for "Green Cleaning" environments.

SMART STEP™ with ARROW TRAX™ and SMART STEP™ with Decalon®

- **Sales Tip:** For surface installations, remember to include the optional beveled edging.
- **Where to Specify:** Foyer entrances of Stores/Shopping Malls, Hospitals, and Office Buildings.

- A NOTRAX® exclusive designed to provide years of service in the busiest of foyers.
- Alternating rows of ribbed vinyl and carpet strips scrape and dry the foot traffic of hundreds of visitors per day.
- The #323 version features 38 ounce per square yard Arrow Trax™ carpet matting strips for excellent scraping and drying.
- The #325 version features cut-pile Decalon® carpet matting strips for effective moisture retention.
- Can be placed within a foyer recess - depth of 3/8" to 1/2" - allow 9/16" door clearance.
- Can also be placed directly on floor - allow 9/16" door clearance.
- Ribbed vinyl sections can be perforated to facilitate drainage (recommended for recess areas only)
- Overall thickness: #323 is 9/16" and #325 is 1 1/2"
- Mat is fully assembled at the factory to your custom size specification.
- Orders must be accompanied by a sketch clearly indicating width, length and direction of traffic flow.
- When you measure, remember: Proper placement is for the strips to run width of mat.
- All mats larger than 12 feet by 22 feet will be made in 2 or more sections

- **Sales Tip:** Due to the unique compound used, mat cannot be perforated.
- **Where to Specify:** Meat lockers and specialty freezer applications.

- The only rubber mat specifically formulated to perform in deep-freeze environments.
- Anti-slip matting that features a raised knob solid top surface to enhance traction.
- Tested to withstand temperatures to minus 40 degrees Fahrenheit (approx. -40 Celsius)
- Overall thickness is 3/8 inch.

#035

SKATE-SPIKE RESISTANT MATTING™

- **Sales Tip:** To minimize mat movement, be certain floor is free of dirt particles before laying mat.
- **Where to Specify:** Skating rinks, locker rooms, gymnasiums. Temporary or permanent placement over expensive carpet in heavy traffic areas.

- A durable vinyl linear ribbed top surface minimizes damage to floors from spikes /skates.
- Overall thickness is 1/4 inch.

#045

WEIGHT ROOM MATTING

- **Sales Tip:** The shear weight of the mats (130 pounds for the 3/4") helps keep the mats in place.
- **Where to Specify:** Weight rooms, health clubs, gymnasiums.

- Indestructible rubber slab matting with textured top surface protects floors from weight lifting equipment.
- Overall thickness: Available in 1/2 inch or 3/4 inch

#769

CLEAR TRAX™

- **Sales Tip:** Recommend for use only on looped pile carpeting
- **Where to Specify:** Temporary or permanent placement over expensive carpet in heavy traffic areas.

- Heavy duty clear PVC ribbed top runner protects carpeting from the debris of foot traffic.
- Mini-spiked underside clings to carpet to resist movement
- Overall thickness is 1/8 inch.

- **Sales Tip:** Be certain that primary surface area is completely dry and clean before applying the "peel & stick" backing or the optional Sealing Compound.
- **Where to Specify:** Inclines, ramped walkways.

- Slip resistant pads are affixed to surfaces to increase friction providing a safer pathway.
- Top surface is embedded with silicon carbide particles. As the particles wear, they chip into continuously aggressive finer particles that continue to provide function.
- Pressure adhesive backing allows for easy "peel and stick" installation.
- An optional edge sealing compound is recommended for applications exposed to water, grease or oil.

Knee RX HD**

**#950
#951**

SPECIALTY

- **Sales Tip:** Provides a comfortable work surface for those who are required to occasionally kneel while working. Eliminates the hassle and discomfort of wearing knee pads.
- **Where to Specify:** : Tool carts, Maintenance carts, Individual workstations

- Designed for comfort and durability in extreme kneeling applications
- For use on gravel, asphalt, concrete, dirty/oily surfaces, tile & wood flooring, metal grating, grass
- Nitrile/PVC foam blend for the highest degree of resistance to oils and greases
- Full 1" thick for the ultimate in comfort
- Durable laminated heavy-duty rubber bottom surface for additional comfort and long-lasting wear in rough environments (#951 Knee RX HD only)
- Self extinguishing, non-conductive, silicone free material
- Size: 12" x 22"
- Built-in handle easy to carry or hang up

- **Sales Tip:** Ideal product for basic anti-fatigue and antistatic relief in an office or light-duty application.
 - **Where to Specify:** Work station environment that requires anti-fatigue relief while working with delicate circuitry or components
- Dissipative /anti-static matting is formulated to absorb static electricity. This matting drains static from worker keeping sensitive circuitry from damage.
 - Specially compounded pebble-embossed PVC sponge manufactured with NOTRAX® exclusive Dyna-Shield® protective top layer.
 - All four sides are beveled to minimize trip hazards.
 - Overall thickness is 3/8 inch.
 - Testing is per EOS/ESD Association Draft Standard, "Standard for Protection of Electrostatic Discharge Susceptible Items = Worksurfaces" EOS/ESD-S4, Draft January 1988.
 - RTG measured at Moderate and 12% RH, at 10V and 100V = 109 ohms.

- **Sales Tip:** For maximum effectiveness, we highly recommend that the end-user properly attaches the grounding cord which is included at no charge. It easily snaps into a grommet which is installed in the mat at our factory.
- **Where to Specify:** Assembly or testing areas for circuitry: computers, chips, electronics of all kinds.

- Dissipative /anti-static matting is formulated to absorb static electricity. This matting drains static from worker keeping sensitive circuitry safe from damage.
- Durable vinyl diamond-plate top surface is combined with dense closed cell foam base utilizing NOTRAX® exclusive UniFusion™ technology.
- Provides excellent anti-fatigue support with a textured anti-slip surface
- Overall mat thickness is 9/16 inch.
- Sloped beveled foam on all 4 undersides affords easy access onto and off of mat.
- Custom widths available

- **Sales Tip:** We highly recommend that the mat be replaced every 12 months for optimum performance.
- **Where to Specify:** : In front of high voltage boxes, electrical fuse boxes, transformers.

- Insulative PVC matting is formulated to provide insulation to the worker from being grounded thus preventing electrical shock.
- Each square foot of this matting is tested in conformance with ANSI/ASTM D-178 specifications and meets or exceeds the following:
 - Type 2 Compound: Polyvinyl Chloride
 - Class 2 Di-electric Strength: 30,000 volts
 - Proof test of 20,000 volts
 - Recommended maximum usage of 17,000 volts.

PRODUCT TERMS / GLOSSARY

ANTI-FATIGUE PROPERTIES: Cushioning qualities found in NOTRAX® matting that alleviates foot pressure, stimulates blood circulation and helps reduce stress on the lower back, leg joints and major muscle groups.

CHEMICAL RESISTANCE: The degree to which NOTRAX® industrial matting products can withstand the erosive qualities of chemicals found in applicable environments.

DECALON®: An exclusive NOTRAX® fiber constructed of high Denier polypropylene yarn. Products manufactured with Decalon® offer superb wear resistance, exceptional moisture retention, and crisp pattern appearance in coordinating colors. See products **#130, #131, #132, #137, #138, #139, #141, #146, #148, and #325.**

DENIER: Denier is defined as the thickness of the yarn strand. Combined with the face-weight (ounces of yarn per square yard), and the density or volume of yarn strands, it is a critical factor in the performance, quality and durability of an entrance mat. NOTRAX® competitors define their quality in terms of face-weight only.

DYNA-SHIELD®: A revolutionary new process perfected by Superior Manufacturing Group that creates a tough protective barrier on the

surface of foam anti-fatigue mats. Dyna-Shield® products are more resistant to wear than traditional sponge matting. See products **#406, #413, #415, #417, #419, and #825.**

GSII: A technology incorporated into NOTRAX® industrial floor matting products that allow them to excel in harsh industrial environments where aggressive chemicals, oils, and greases are commonly found, and where traditional matting often fails. See products **#850GSII, #856GSII.**

NEEDLEPUNCH: A manufacturing process for carpet matting, needlepunch is engineered with a unique blend of 4 Denier thicknesses of polypropylene yarn ranging from very fine to very thick. Needlepunch products are typically more durable, offering better crush resistance and wearability due to the density of the yarn used in the process. See products **#105, #109, #117 #118, #136, #323, and #370.**

NITRILE RUBBER: A synthetic rubber specifically designed for harsh environments providing superior oil, grease, animal fat, and chemical resistance, abrasion resistance, gas permeability, and thermal stability. Niru® is the NOTRAX®, trademarked name for Nitrile rubber compound. See products **# 543, #544, #550, #551, #556, #562, #650, #656, #755, #758, #850GSII, #856GSII**

PVC COMPOUNDS: PVC (Polyvinyl Chloride) is a plastic compound used in a variety of manufacturing processes and end products. PVC is known for its durability, resistance to moisture, versatility, and its ability to withstand harsh environments.

TUFTED: An alternative process to needlepunch for manufacturing carpet matting, tufted products are sewn into a backing using a finer yarn. Tufted mats generally are less dense and offer better moisture retention. Tufted products also have more flexibility with colors and patterns providing a more aesthetic finished product. See products **#130, #131, #132, #137, #138, #139, #141, #145, #146, #148, #150, #161, #166, #167, #168, #170, #180, #190, #231, and #325.**

UNIFUSION™: A revolutionary new bonding technology that uses heat and pressure to fuse a floor matting top surface to a base material. The resulting finished product is virtually a single piece, thereby eliminating the possibility of de-lamination. See products **#470, #474, #479, #480, #826, #970, #974, #979, #980**

PRODUCT TESTING

All NOTRAX® Floor Matting Products are subject to the following applicable tests, conducted by independent laboratories prior to their introduction to the market:

All NOTRAX® carpet products passed the Flammability Test (PillTest DOC FF1-70).

Accelerated Soiling Test (ASTM D6540): Designed to simulate the soiling that occurs from foot traffic/floor service in normal use as an entrance mat.

Accelerated Wear Test (S.I.M. Floor Machine): Designed to simulate the wear an entrance mat will receive under normal foot

traffic. The results show the relative wear and crush resistance of the mat.

Water Retention: Designed to simulate the moisture retention of an entrance mat in actual usage. Tests are reported in gallons per square yard.

Abrasion Resistance (ASTM D3884-92): This is an accelerated wear test for NOTRAX® products. Results are measured in weight loss.

Compression Deflection (ASTM D3574): This test assesses the anti-fatigue properties of industrial mats.

Coefficient Of Friction (ASTM C 1028-89): Designed to assess the slip resistance of our matting.

Elongation (ASTM D412): This test measures the weight needed to break, and the % of size increase at the breaking point.

Tear Strength (ASTM D1004): This test measures the force required to initiate the tearing of a mat.

Critical Radiant Flux (ASTM E648-94A): This test measures the level of radiant heat energy required to sustain flame propagation.

MATTING ICONS

Drainage: Open construction allows for moisture to pass through, providing secure footing in a wet environment.

Anti-Slip: Matting designed to provide added traction through aggressive surface patterns and textures.

Welding: Made of durable rubber compounds, these mats can be used in areas where welding takes place.

Non-Conductive: Formulated to provide insulation for the worker. It prevents the worker from being "grounded", thereby preventing electrical shock.

Outdoor Use: Heavy-duty construction designed to act as a first line of defense against tracked-in dirt by scraping, soil and moisture from shoes.

Custom: Mats available in custom sizes and/or lengths.

Food Service: Matting suitable for use in kitchens, bars and other food service areas where durability, grease resistance and drainage are a priority.

Ergonomic/Anti-Fatigue: Matting that alleviates foot pressure, stimulates blood circulation and helps reduce stress on the lower back, leg joints and major muscle groups.

Food Processing: Matting suitable for use in food processing plants/areas where exposure to animal fats, greases, and oils are common.

Anti-Static: Formulated to absorb static electricity.

Bromine	Liquid/Gas	Halogen		4	4	4	4	4	2	2	2	2
Butane	Liquid	Aliphatic HC		4	4	4	1	1	3	3	3	3
Butter	Solid/Liquid			4	4	4	1	2	1	1	1	1
Butyl Acetate	Liquid	Carboxylic Acid (Aliphatic)		4	4	4	4	4	3	3	3	3
Butyl Alcohol (butanol)	Liquid	Alcohol		1	1	1	1	1	1	1	1	1
Calcium Chloride	Solid	Inorganic Salt		1	1	1	1	1	2	2	2	2
Calcium Hydroxide	Solid	Metal Hydroxide		1	1	1	1	1	2	2	2	2
Carbolic Acid (liquid phenol)	Liquid	Acid (organic)		4	4	4	4	4	4	4	4	4
Carbon Monoxide	Gas	Inorganic Carbon Compound		3	3	3	2	2	1	1	1	1
Carbon Tetrachloride	Liquid	Halogenated Organic Liquid		4	4	4	3	3	4	4	4	4
Chicken Fat	Solid/Liquid			4	4	4	2	2	2	2	2	2
Chloroacetone	Liquid	Ketone		4	4	4	4	4	4	4	4	4
Chloroform	Liquid	Aliphatic HC		4	4	4	4	4	4	4	4	4
Chromic Acid	Liquid	Acid (weak)	50%	4	4	4	4	4	3	3	3	3
Citric Acid	Liquid	Acid (weak, organic)	10%	1	1	1	1	1	2	2	2	2
Corn Oil	Liquid	Fatty Acid		4	4	4	1	2	1	1	1	1
Cottonseed Oil	Liquid	Aliphatic HC		4	4	4	2	3	1	1	1	1
Cyclohexane	Liquid	Aliphatic HC		4	4	4	1	1	4	4	4	4
Cyclohexanol	Liquid	Alcohol (cyclic)		4	4	4	3	3	1	1	1	1
Cyclohexanone	Liquid	Ketone		4	4	4	4	4	4	4	4	4
Dibutyl Phthalate	Liquid	Ester		4	4	4	4	4	3	3	3	3
Diesel fuel	Liquid	Petroleum HC		4	4	4	1	1	3	3	3	3
Diesel Oil	Liquid	Petroleum HC		4	4	4	1	1	3	3	3	3
Diocetyl Phthalate (DOP)	Liquid	Ester		4	4	4	3	3	4	4	4	4
Ethane	Liquid	Aliphatic HC		4	4	4	1	1	1	1	1	1
Ethyl Acetate	Liquid	Ester		2	2	2	4	4	3	3	3	3
Ethyl Alcohol (ethanol)	Liquid	Alcohol		1	1	1	1	1	3	3	3	3
Ethyl Ether	Liquid	Ether		4	4	4	3	3	3	3	3	3
Ethylene Glycol (antifreeze)	Liquid	Alcohol		1	1	1	1	1	1	1	1	1
Formaldehyde	Liquid	Aldehyde	37%	3	3	3	2	2	1	1	1	1
Formic Acid	Liquid	Acid (weak, organic)		2	2	2	2	2	1	1	1	1
Fresh Water	Liquid			1	1	1	1	1	1	1	1	1
Fuel Oil	Liquid	Aliphatic HC		4	4	4	1	1	2	2	2	2
Gasoline	Liquid	Aliphatic HC		4	4	4	1	1	3	3	3	3
Gear Oil (85W-140)	Liquid	Paraffin Oil		4	4	4	1	1	2	2	2	2
Glucose	Liquid	Sugar		1	1	1	1	1	1	1	1	1
Glycerin	Liquid	Alcohol		1	1	1	1	1	1	1	1	1
Heptane	Liquid	Aliphatic HC		4	4	4	1	1	2	2	2	2
Hexane	Liquid	Aliphatic HC		4	4	4	1	1	3	3	3	3
Hydraulic Fluid	Liquid	Aliphatic HC		4	4	4	1	1	2	2	2	2
Hydrazine	Liquid	Base (weak)		4	4	4	2	2	1	1	1	1
Hydrochloric Acid	Liquid	Acid (strong)	30%	2	2	2	4	4	2	2	2	2
Hydrofluoric Acid	Liquid	Acid (weak)	30%	4	4	4	4	4	3	3	3	3
